

IT Team Lead

About Polixis

Headquartered in Geneva, Switzerland, Polixis is a leading Swiss company specialized in RegTech Solutions for banking & financial sector offering unparalleled deep data and automation solutions.

Our Yerevan office is located in a symbolic villa that housed Professor Sergey Mergelyan, located right in front of the National Parliament and is now home to 30+ growing team. Along with Geneva, Yerevan is one of our strategic development hubs.

Description

We are looking for an experienced Development Team Leader (7+ experience) to lead the operations of our engineering team in Yerevan office. Our technology stack includes Java/Spring, Python, React JS, MongoDB and more. Products developed by our teams are high security web-services operating on Big-Data data lakes, ML/AI solutions, Computational Linguistics modules and more.

Responsibilities

- Supervise Development process and related operations keeping close contact with the Geneva Team;
- Actively support, coach and mentor the team members;
- Code Review process execution and sprint quality & delivery supervision.

Skills and Qualities

- Managerial ambitions and ability to lead a team of engineers;
- Self-motivated personality;
- Ability to supervise and monitor the working discipline within the team;
- Knowledge related to AI/ML will be advantageous;
- Previous experience as a team lead will be considered an advantage.

Technical Skills

It is important to note that the bulk of our work is conducted within Java/ Spring environment. However, the Team Lead can have his/her core expertise in any of the following fields.

- Extensive professional working experience as a Java developer in J2EE using any of the following products: Spring, Springboot, Hibernate, Elasticsearch, RabbitMQ; Good understanding of OOP programming principles and design patterns;
- Machine Learning algorithms, Natural Language Processing; Broad knowledge of modern Artificial Intelligence techniques; Big Data processing and programming experience; Strong math background; Programming experience in Python (any other languages such as Java, C++ or JavaScript are a plus).

What we offer

- Competitive salary;
- Possibility to grow with one of Europe's Top RegTech firms;
- First class training and experience in understanding regulatory and practical framework of European banking operations and associated FinTech products.

Application Procedure

Interested candidates should send their CVs to jobs2@polixis.com with a subject line "IT Team Lead".
