You will be expected to directly work with our IT Operations Head in Yerevan & CTO in Geneva being involved in new features designs & execution with 360-degree view on products and operations. The prospective candidate will also be expected to be involved in business continuity exercise for existing applications.

## JOB RESPONSIBILITIES

- Produce and maintain clean, high-quality code;
- Build robust and scalable software
- Work as a part of a dynamic team throughout the software development life-cycle;
- Deliver results within an Agile methodology
- Working on a platform, which supports the technology stack and all traffic

## REQUIRED QUALIFICATIONS

- Bachelor's degree in Computer Science, Computer Engineering;
- Extensive working experience as a Java developer in J2EE using any of the following products: Spring, Springboot, Hibernate
- Good understanding of OOP programming principles and design patterns;
- Working experience in MySQL or similar Relational Dbs;
- Working experience in NoSQL databases
- Knowledge in TDD principles is a plus;
- Good knowledge of English;
- DevOps knowledge of any level is a plus.

## WHAT WE OFFER

- Competitive salary;
- Full health care coverage;
- Flexible vacation and day-off policy;
- A possibility to grow within a growing company with expertise on Risk & Compliance
- First-class training and experience in understanding the regulatory and practical framework of European banking operations and associated FinTech products;
- Creative and cozy office at the center of Yerevan.

## HOW TO APPLY

Interested candidates should send their CVs to [jobs2@polixis.com](mailto:jobs2@polixis.com) with the subject line **"Mid/Senior Java Engineer"**. Please, kindly note that only shortlisted applicants will be contacted.

Please, also note that this is a full-time position and cannot be combined with any other positions.
